

FENDI FALL/WINTER 2014-2015 FASHION SHOW SUNGLASSES

Fendi, for Fall/Winter 2014-2015, presents the Galassia sunglasses. In a perfect blend between retro feeling and contemporary feminine allure, the new model embodies Fendi's aesthetic codes for the new season, celebrating the sensuality of lightness and transparency.

Different materials are melted together in a modern architectural shape: the cat-eye frame in acetate is enriched by faceted Havana or multi-coloured elements framing the lenses, in a game of contrasts.

The ethereal shape in metal, highlighted by graphic lines underlining the eyes, is completed by a thin metal bridge and slim metal temples with a flat design, enhanced by refined enamel colours.

The colour palette includes subtle shades, such as black/crystal with multicolour insert and azure shaded lenses, rust/crystal with Havana red insert and orange pink lenses, turquoise/crystal with multicolour insert and azure shaded lenses, white/crystal with multicolour insert and yellow shaded lenses.
